➢ Question 3 - Large Countries by Area or Population

SQL Query:

```
SELECT NAME, POPULATION, AREA
FROM WORLD
WHERE AREA >= 3000000 OR POPULATION >= 25000000;
```

What does this query do?
Returns countries that either have a **very large area** (at least 3 million) or a **very high population** (at least 25 million).

Explanation:

- `SELECT NAME, POPULATION, AREA`: Choose the relevant columns.
- `WHERE AREA >= 3000000 OR POPULATION >= 25000000`: Apply filtering based on either large area or population.

Quick Revision:

- `>=` means greater than or equal.
- `OR` means at least one of the conditions must be true.
